OPERATION MANUAL

description

The Zigbee NOUS B3Z switch (hereinafter - the switch) is designed to organize automatic and manual shutdown of electrical appliances in the room, through remote access via the Internet, using a smartphone or tablet with the Nous Smart Home application installed. Communication with the switch is configured through a remote server using the P2P protocol, for which a wireless zigbee adapter is used. The switch is equipped with a mechanical button and a global indication of the device status. The device is equipped with an electromechanical relay.

NOTE: You will need a Nous E1, Nous E7 or

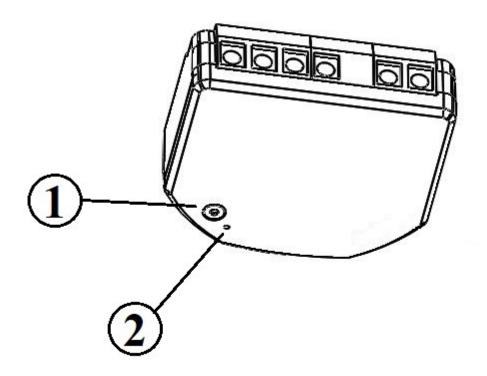

other Tuya compatible ZigBee gateway/hub to connect.

The connection of a smart socket to the Internet cannot be guaranteed in all cases, as it depends on many conditions: the quality of the communication channel and intermediate network equipment, the make and model of the mobile device, the version of the operating system, etc.

PRECAUTIONS

- Read this manual carefully.
- Use the product within the temperature and humidity limits specified in the technical data sheet.
- Do not install the product near heat sources, such as radiators, etc.
- Do not allow the device to fall and be subject to mechanical loads.
- Do not use chemically active and abrasive detergents to clean the product. Use a damp flannel cloth for this.
- Do not overload the specified capacity. This may cause short circuit and electric shock.
- Do not disassemble the product yourself diagnostics and repair of the device must be carried out only in a certified service center.

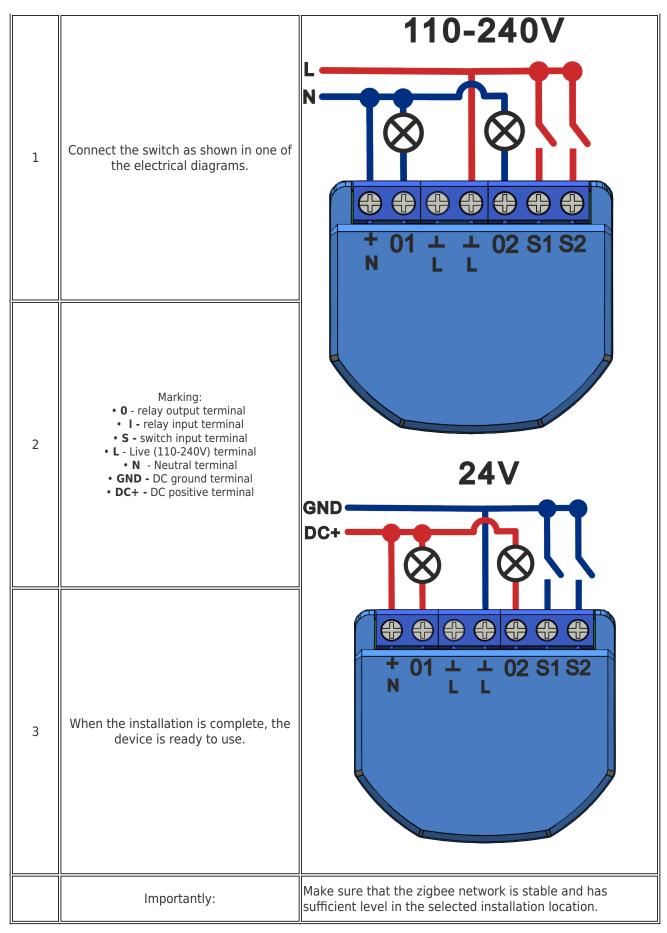

Design and controls

N₂	Name	description
1	Button	A short press of the button switches the device "ON" "OFF". A long press of the button (5-7 C) resets the smart outlet settings and zigbee network connection parameters.

Connection

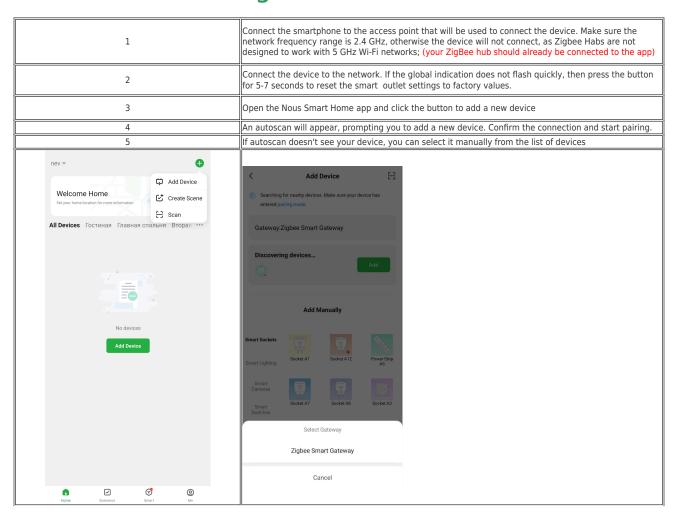

To connect the Nous B3Z device, you need a smartphone based on the Android or iOS

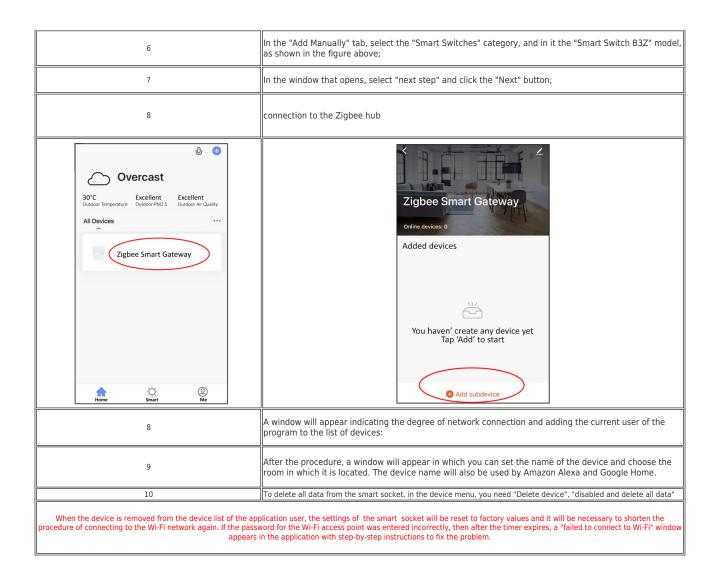

mobile operating system with the Nous Smart Home application installed. This mobile application is free and available for download from Play Market and App Store. The QR code for the application is given below:

After installing the program, for its correct operation, it is necessary to grant it all permissions in the corresponding section of the smartphone settings. Then you need to register a new user of this program.

The procedure for connecting the device to the Zigbee network:

How to connect your device to Alexa

1	Sign in with your Alexa account and password (if you're not already signed in, sign up first); After logging in, click the menu in the upper left corner, then click "Settings" and select "Set up a new device";
2	Select "Skills" in the options bar, then search for "NOUS Smart Home" in the search bar; In the search results, select NOUS Smart Home, then click Enable.
3	Enter the username and password you previously registered (the account is only supported in the United States); When you see the correct page, it means that your Alexa account is linked to your NOUS Smart Home account.
