OPERATION MANUAL

description

The Nous L14 ZigBee Smart Water Valve provides automated and efficient plant care. It controls water delivery with a flow meter and supports the Zigbee 3.0 communication protocol. The device features a child lock function and supports scenario linkage, allowing, for example, watering to start when temperature or humidity is low. Battery level monitoring and watering records are available via the "Smart Life" app. The device's casing has an IP66 waterproof rating.
⚠️ **NOTE:** **You will need a Nous E1, Nous E7 or other Tuya compatible ZigBee gateway/hub to connect.**

The connection of a smart socket to the Internet cannot be guaranteed in all cases, as it depends on many conditions: the quality of the communication channel and intermediate network equipment, the brand and model of the mobile device, the version of the operating system, etc.

PRECAUTIONS

- Read this manual carefully.
- Use the product within the temperature and humidity limits specified in the technical data sheet.
- Do not install the product near heat sources such as radiators, etc.
- Do not allow the device to fall and be subject to mechanical loads.
- Do not use chemically active and abrasive detergents to clean the product. Use a damp flannel cloth for this.
- Do not overload the specified capacity. This may cause short circuit and electric shock.
- Do not disassemble the product yourself - diagnostics and repair of the device must be carried out only in a certified service center.

Design and controls

| No.	Name	description
1	Indicator	Shows the current state of the device
2	Button	A short press of the button switches the device "ON" "OFF". A long press of the button (5-7 C) resets the settings of the smart socket and the Wi-Fi network connection parameters.
3	Battery compartment	4xAA battery
4	Water inlet	3/4 inch to 1/2 inch connector
5	Water outlet	Water outlet connected to the hose faucet outlet

Connection

To connect the Nous L14, you need a smartphone based on the Android or iOS mobile operating system with the Nous Smart Home application installed. This mobile application is free and available for download from Play Market and App Store. The QR code for the application is given below:

After installing the program, for its correct operation, it is necessary to grant it all permissions in the corresponding section of the smartphone settings. Then you need to register a new user of this program.

# The procedure for connecting a smart socket to the Zigbee network:

1	Connect your smartphone to the access point that will be used to connect the device. Make sure the network frequency range is 2.4 GHz, otherwise the smart socket will not connect, because Zigbee Habs are not designed to work with 5 GHz Wi-Fi networks; (your ZigBee hub should already be connected to the app)
2	Turn on the smart socket to the network. If the global indication does not flash quickly, then press the button for 5-7 seconds to reset the smart outlet settings to factory values.
3	Open the Nous Smart Home app and click the button to add a new device
4	An autoscan will appear, prompting you to add a new device. Confirm the connection and start pairing.
5	If autoscan doesn't see your device, you can select it manually from the list of devices
6	In the "Add manually" tab, select the "Smart sockets" category, and in it the "L14" model, as shown in the figure above;
7	In the window that opens, select "next step" and click the "Next" button;
8	connection to the Zigbee hub

8	A window will appear indicating the degree of network connection and adding the current user of the program to the list of devices:
9	After the procedure, a window will appear in which you can set the name of the device and choose the room in which it is located. The device name will also be used by Amazon Alexa and Google Home.
10	To delete all data from the smart socket, in the device menu, you need "Delete device", "disabled and delete all data"

When the device is removed from the device list of the application user, the settings of the smart socket will be reset to factory values and it will be necessary to shorten the procedure of connecting to the Wi-Fi network again. If the password for the Wi-Fi access point was entered incorrectly, then after the timer expires, the application will show a "failed to connect to Wi-Fi" window with step-by-step instructions to fix the problem.
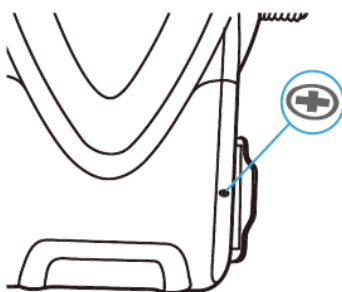

Installation

The video camera can be fixed on the ceiling using the mounting plate from the delivery kit, or installed on a flat horizontal surface - the base of the video camera is rubberized and will not slide over the surface.
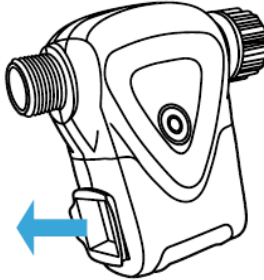

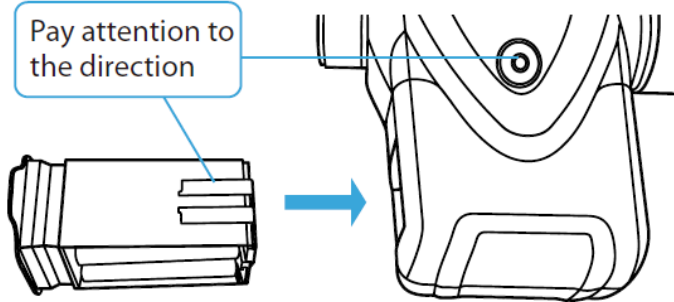

Installation procedure using the mounting plate:

|		
1	According to the picture below to install the accessories and the device complete.	**Water outlet connector** **3/4 inch to 1/2 inch connector**
2	Close the water pipe valve and connect the equipment connected in step ① to the water valve	**Water pipe valve** **3/4 inch to 1/2 inch connector**
3	After installation, open the water pipe valve and pair the equipment distribution network to the APP according to the instructions to use it	**Sprinkler switch**
4	When the installation is completed, you can serve.	**Water outlet connected to the hose faucet outlet** **Connector (connect to water pipe)**
⚠️	Important:	Make sure that in the selected place of installation the Wi-Fi network is stable and has a sufficient level.

Battery replacement

Insert 4xAA standard alkaline batteries into the terminals. Observe + position. When inserting back into the battery compartment, pay attention to the direction of the shrapnel, and maintain the same orientation as the pouring switch button/indicator light

Battery replacement:		
1	Remove the screw	

2	Take out the battery compartment	
3	Install 4xAA battery, Replace the battery compartment.	

How to connect your device to Alexa

1	Sign in with your Alexa account and password (if you're not already signed in, sign up first); After logging in, click the menu in the upper left corner, then click "Settings" and select "Set up a new device";
2	Select "Skills" in the options bar, then search for "NOUS Smart Home" in the search bar; In the search results, select NOUS Smart Home, then click Enable.
3	Enter the username and password you previously registered (the account is only supported in the United States); When you see the correct page, it means that your Alexa account is linked to your NOUS Smart Home account.
4	Device discovery: Users must tell Echo, "Echo (or Alexa), open my devices." Echo will start to find the devices added in NOUS Smart Home APP, it will take about 20 seconds to show the result. Or you can click "Open devices" in Alexa APP, it will show the devices found successfully. Note: "Echo" is one of the wake-up names, which can be any of these three names (Settings): Alexa/Echo/Amazon.

5	List of support skills User can control devices with following instructions: Alexa, turn on [device] Alexa, turn off [device]
Attention: the name of the device must match the NOUS Smart Home APP.
